

SAUER High-pressure breathing air compressors up to 400 barg

Sauer Compressors offers a full range of high-pressure compressors which are ideally suited for professional breathing air application even in continuous operation.

In addition to breathing air systems for governmental customers and navies, Sauer also offers individual solutions for professional diving companies and offshore service providers.

Breathing Air Compressor Range

//// Tornado

Pressure: 50–400 barg
Volume Flow: 10–25 m³/h | 160–415 l/min
Rated Power: 5–15 kW

//// Hurricane

Pressure: 50–400 barg
Volume Flow: 30–120 m³/h | 500–2000 l/min
Rated Power: 10–52 kW

Complete Breathing Air Solutions

Based on the robust Sauer high-pressure compressors, Sauer also supplies complete breathing air solutions including breathing air filtration and filling panels.
